

# PRECISION TOOLED + CAST PLAQUES

## DISCOVER THE BEST PLAQUE OPTION FOR YOUR PROJECT

### PRECISION TOOLED

### CAST

Precision tooled plaques provide exquisite, crisp detail that is generally manufactured faster and more cost-effective than cast. UV Colorlast and braille options available to expand your design capabilities.

Cast plaques allow you to create realistic, sculpted details for timeless expressions of people, scenes, and images. Design in increased sizes and thicknesses compared to precision tooled and other plaque options.
