## Why Gemini For All Your Dimensional Signage

### **A Proven Track Record.**

Gemini has been an established name in the sign industry for the past half century. Organized in 1963 in Minneapolis, Minnesota. We originally specialized in the manufacture of vacuum-formed plastic products. Shortly thereafter we began manufacturing plastic letters, which marked the beginning of our involvement in the sign industry. Despite dramatic changes in the way the world does business, our philosophy has remained unchanged: to provide the highest quality letters, logos and plaques, at the lowest possible cost, hassle-free, with the quickest delivery in the industry.

### **Capacity for Any Project.**

We have plants located in Minnesota, Iowa, Nevada, Texas and Virginia in the United States; Neustadt, Canada; and Reynosa, Mexico. With more than 600,000 square feet of manufacturing space, we have the capability to handle any custom project that comes our way—large or small.

### **Industry Knowledge.**

We routinely work with virtually every material used in the sign-making process. Our investment in research, development and testing keeps us on the leading edge.

### **Environmental Manufacturing Practices.**

We've always had a long-standing commitment to earth-friendly production, as evidenced by our use of recycled, recyclable and regionally manufactured products, setting the standard for best practices in the industry.

### **Quality Backed by a Lifetime Guarantee.**

Whether you are looking for custom metal, plastic, or illuminated letters, or a cast or precision tooled plaque you can rest assured that your Gemini purchase will be constructed from the highest quality materials and will be guaranteed for life. With our quick turnaround, we hope you'll never have a reason to leave us.

## 5. Portrait & Image Options

### Bas Relief *Available in Standard or Custom Plaques*

We start with a photograph. (Although we can use almost any quality photograph, the better the image, the better the modeling effort.) The finished image will be an artist's interpretation of your photograph. An image rendering of the mold is sent to you via email for your comments or approval. The bas relief is mechanically attached to the cast plaque background.

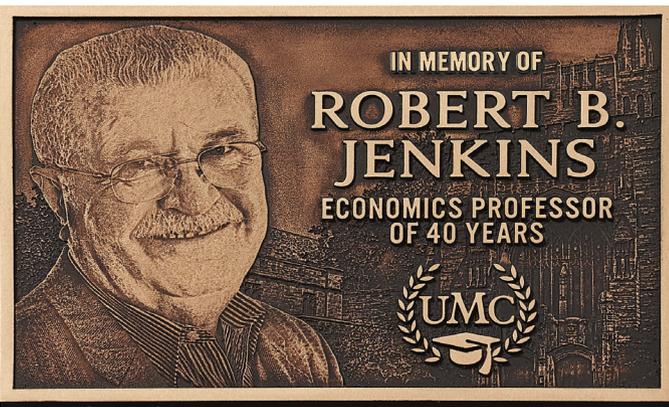

*Standard overall height of 4" to 24" with a finished depth of 3/4" to 1". Not available in the W-N Art Collection.*

### Flat Relief *Available in Custom Plaques only*

An economic alternative to the bas relief, Gemini's flat relief plaques are two-dimensional images that are part of a plaque. The process starts with a good quality photograph or illustration from which our artists create a black and white rendering. Suitable for interior or exterior applications, they perfectly fit the bill when your memorial requires a portrait but the budget won't allow for bas relief.

*Level of detail will be based on size and preference.*

### PhotoRelief™ *Available in Standard or Custom Plaques*

A seamless blend of casting and photography, PhotoRelief™ is perfectly suited for memorials, historical markers, or any plaque that needs to tell a story with words and pictures. Through Gemini's innovative technologies, we can use one or more photographs to create a simple and elegant plaque or a breathtaking collage that illustrates the saying "a picture is worth a thousand words."

High quality/resolution photo required.

*Additional lead time may apply.*

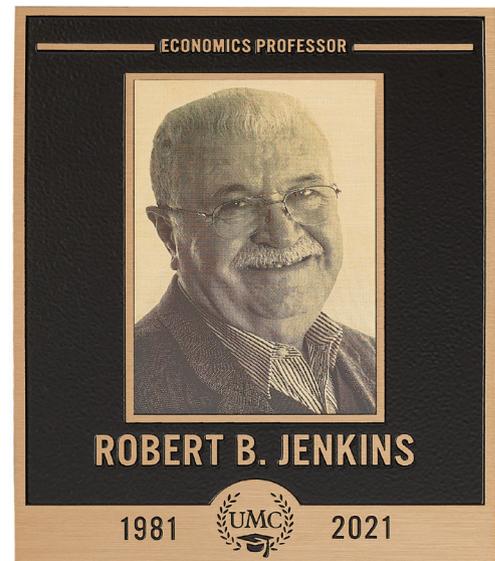

*Not available with the W-N Art Collection.*

### Etched Portrait on Metal

*Available in Standard or Custom Plaques*

The etching process allows you to forever replicate your photograph, line drawing or complex artwork in beautiful detail. This method utilizes a halftone dot pattern made from a 50-line screen. Halftone portraits resemble newspaper photographs, and have visible dot patterns. The etched, recessed dots are filled with black paint to contrast with the brushed finish of the metal background. The best photographs for halftone etched portraits have high contrast tones with bright white areas, dense black areas and minimal gray tones. (Photos that are monotone or have muted colors will produce poor halftone etchings.) Halftone etchings are available in stainless steel, bronze and brass.

*Not available in the W-N Art Collection.*
