

Illuminated Product Guide

Lit signage solutions from a brand you can trust

Lighting Solutions

▼ Face Lit

Face Illumination is the result of LEDs as a light source projecting through a translucent face layer.

▼ Halo Lit

Halo illumination creates a soft glow around the back edge of the letter or logo.

▼ Return Lit

By selectively placing LEDs the result is a glowing edge of the letter. Available as full lit return or partial lit return.

Our Products

▼ Fabricated

Combine the premium look of our fabricated metal products with the sophisticated visibility of diffused halo, face or return illumination.

- Stainless in brushed, polished, titanium and painted finishes
- Aluminum in painted, brushed and anodized finishes
- Up to 6" Depth
- Sizes from 2.5" high up to 100" +

▼ Precision Acrylic

Achieve all the features you need on your next project with the flexibility and precision of acrylic cut designs combined with various illuminated options.

- Sleek low profile high end look
- Thin strokes with 1" and 1.5" depths
- Vinyl and laminate face options

▼ Cast

Now available through our casting process, your unique profiles can now be combined with halo illumination to elevate that next project even further.

- Custom profiles and finishing
- Available in all cast aluminum and bronze finishes
- Sizes from 6" high to 60" +

▼ Gemlite 2.0

Our Gemlite letters and logos allow for custom profiles and detailed designs. Formed from UV stable plastics, Gemlite 2.0 is a proper choice for your next exterior project.

- New sharper edge
- Made from eco-friendly, non-petroleum based plastic
- Creative shapes with raised details
- Up to 45" x 68" single piece

Lighting Options

Need a specific LED temperature or color for your next project? Ask us about our LED brand options.
